Welcome to Cogs-1!
cognitive science is multi-disciplinary, emphasizing understanding of thought, perception, and action from a number of different perspectives.
sense of space

my space (.com) - sociology

the ‘grand’ challenge – computer science

embodiment – philosophy

frame of reference - mathematics

‘place’ fields - neuroscience

personal space - psychology

left bad, right good - linguistics

the future is ‘behind’ me - anthropology
memory space:

Nitz, 2006
